*E*arth is about to be destroyed. Civilization is doomed. You're in command of our latest nuclear fusion space exploration technology. You must use it to discover new worlds and rebuild human civilization in nearby planetary systems. You'll launch probes, select suitable new planets, and establish colonies. Then use nanotechnology to build research robots and facilities. With genetic research, you'll create new food sources, prevent the spread of plagues, and decrease your colonies' mortality rate. You'll also compete with rebel colonies for vital resources, such as food, water, and air. In your desperate struggle to endure, every day you survive is a victory...

UNIQUE FEATURES:

- The most complete and accurate space simulation using the latest CD-ROM technology
- Based on current NASA research in planetary science, robotics, terraforming, an interstellar spacecraft design
- Sophisticated simulation of interstellar colonization
- Hundreds of animated sequences and state-of-the-art 3D rendered graphics create unprecedented photo-realism
- Full music card support. Digitized stereo soundtrack and sound effects
